**Great Research
Made Easy**

A Practical Application for Qualitative and Mixed Methods Research

Text, video, audio, surveys, test scores, demographics ... you can organize and analyze it all in a collaborative team-friendly environment with Dedoose!

From academic research using the highest scientific standards, to high school projects where you're collecting and analyzing data, The Dedoose Research and Evaluation App (REDA) has you covered.

Powerful Features You Can Use

Your research, your way! The flexibility of Dedoose supports any approach - whether purely qualitative or mixed methods.

In Dedoose you can:

- Easily code and analyze qualitative media individually, or as a team
- Create interactive visualizations, including charts, tables, and plots
- Cross-platform functionality enables remote, real-time collaboration
- Autolink qualitative media with quantitative descriptors
- Export everything from raw data to complex visualizations

Dedoose provides a full suite of intuitive and powerful features, with pricing that is accessible to individuals and students, but also robust enough for organizational and department subscriptions.

Try Dedoose for free using your own data for 30 days on us, then pay under \$20 USD per month afterwards, for students and individuals. Your monthly subscription also gives you access to superb technical and academic support.

"Its user-friendliness, affordability, accessibility, and outstanding performance in generating codes and themes makes it my go-to-tool for making sense of my qualitative data."

Dr. Philip Adu;
Founder and methodology expert,
Center for Research Methods
Consulting, LLC.

Top 10 Reasons Why Customers Choose Dedoose

Accessible

Dedoose is accessible to both individuals and teams. We work hard to ensure students pay less than \$20 USD per month, and partner with organizations to create flexible subscription plans.

Cloud Based

With a secure cloud based environment, Dedoose allows you to access your data from anywhere across platforms (ex. Mac, Windows, Linux).

Collaborative

In Dedoose, it is easy for individuals or teams to approach a research project from across disciplinary boundaries.

Technical & Academic Support

Caring for our user community is fundamental to our identity. We respond quickly and personally to requests for technical and methodological assistance.

Advanced Technology

Real-time collaboration, interactive visualizations, and support for inter-rater reliability are just a few of the ways Dedoose is advancing research technology.

For Researchers, by Researchers

Dedoose was created following decades of social science research conducted at UCLA research labs. We know what researchers need; and how these needs evolve over time.

Intuitive

Dedoose is easy to learn and use, and rich with interactive data visualizations to help you quickly identify and explore hidden patterns.

Safe & Secure

Data security is our number one concern. Our team ensures Dedoose stays at the cutting edge of data protection compliance.

Easy Migration

With easy-to-follow steps, we offer direct migration of project data from other software straight into Dedoose... and all at no cost!

Frequent Enhancements

Dedoose is constantly evolving to ensure the system is running smoothly and to regularly incorporate new features based on user suggestions and needs.
